Transmittal of specimens from EU member states

Dear customer,

We are required to inform you that due to legal regulations the transmittance of sera and swab specimens from animals from EU member states to the IVD GmbH is committed to the following **terms and conditions**:

1. Enclosure of a certificate of health made out by the authorized official veterinarian of the point of origin of the specimens/animals which accounts for the fact that
 - none of the diseases that are listed by the O.I.E. (<https://www.oie.int/en/animal-health-in-the-world/oie-listed-diseases-2021/>), as far as they can be transmitted to the according animal species, have been detected within the flock of origin of these animals during the last three months previous to the sampling;
 - the flock of origin of the animals is not situated within a restriction.

The original certificate of health has to accompany the transmitted samples, has to be written in German or to be provided with a legalized German translation and has to consist of not more than one page. It is valuable for 10 days after the day of issue.

2. The specimens have to be packed in such an appropriate way that even after any damage to the shipping box no material can ooze out.
3. The specimens have to be shipped directly to the IVD GmbH.

Please attend to these restrictions when sending samples for diagnostic purposes from EU member states others than Germany.

For further information please contact only your local veterinary officer.

Kind regards,

Dr. Katrin Strutzberg-Minder & Dr. Matthias Homuth
